#### **1. Executive Summary**

AsiaBaseMetals Inc. ("the Company") is a growth company focused on the exploration and development of metals, including precious metals such as gold and silver, base metals such as zinc and alkali metals such as cobalt and lithium. The Company has projects in British Columbia, Canada.

#### **Plan of Arrangement:**

On September 1, 2020, the Company completed a spin-out transaction which was completed by way of a court approved statutory plan of arrangement under the *Business Corporations Act* (British Columbia) (the "**Plan of Arrangement**") involving the Company and its three newly incorporated wholly owned subsidiaries (incorporated on July 6, 2020), Mantra Exploration Inc. ("**SpinCo-1**"), Mantra Pharma Inc. ("**SpinCo-2**") and Mantra 2 Real Estate Inc. ("**SpinCo-3**"), and collectively with SpinCo-1 and SpinCo-2, the "**SpinCo Entities**"; having entered into an arrangement agreement with the SpinCo Entities on July 10, 2020; received an Interim Order from the Supreme Court of Canada on July 17, 2020, shareholder approval at the Annual General Meeting of shareholders held on August 19, 2020, the Final Order from the Supreme Court of Canada on August 26, 2020 and having satisfied or waived all other conditions. Pursuant to the Plan of Arrangement, SpinCo-1. received via a transfer the Company's Jean Iron Ore Project, SpinCo-2 received via a transfer the Company's option to acquire certain cannabis interests and SpinCo-3 received via a transfer the Company's option to acquire certain real property interests.

As a result, the Plan of Arrangement reorganized the Company and its assets and operations into four separate companies: the Company, SpinCo 1, SpinCo 2 and SpinCo 3. In addition, in consideration of the foregoing, the Shareholders as of the record date received one common share in the capital of each of the SpinCo Entities, in exchange for each share of the Company held. The board of directors of the Company believes this provides Shareholders with additional investment choices and flexibility and enhances value as each of the SpinCo Entities will be solely focused on the pursuit and development of their respective business operations and assets.

#### **Gnome Project:**

The Gnome zinc project has land claims that encompass 5,868 hectares and are located strategically in the heart of an area home to some of Canada's important zinc deposits and the focus of much past exploration. The Gnome project lies 70 km SE from the Cirque Zn-Pb-Ag deposit and 46 km SE along trend from the Akie Zn-Pb-Ag deposit, all of which are in the Kechika trough, a geological belt northeast of Williston Lake containing these and other sediment-hosted Zn-Pb-Ag prospects along trend. These deposits and prospects were discovered in the heyday of northern British Columbia Zn-Pb-Ag exploration during the late 1970's and early 1980's.

Work on the Gnome project to date includes mapping and sampling during the 1970's and exploration work by the Company. The Company conducted an exploration program during fiscal 2012, fiscal 2013, fiscal 2018 and fiscal 2019. This historical work has identified six target areas listed as Areas A-F on the Property. The 2019 exploration program included drilling on HQ size core hole down to a depth of 140m to test targets in Area C. Although the drill hole intersected favourable lithological unit of Gunsteel Formation comprising of grey and black carbonaceous shales with 1-3% sulphides, the assays indicated no anomalous values of target metals. The 2019 work also included prospecting, mapping and sampling work in areas D and G (a newly identified target area). Results of 16 soil and 4 rock sampling in new area G has shown favourable results. The results indicate Area G as new potential target for further exploration work.

#### **10. Financial Instruments and Other Instruments (continued)**

##### *Financial Risk*

##### (i) Credit Risk

Credit risk arises from non-performance by counterparties of contractual financial obligations. The Company's maximum credit risk is primarily attributable to its cash. The Company limits its exposure to credit loss for cash by placing such instruments with financial institutions.

As at September 30, 2020, the Company's maximum exposure to credit risk is the carrying value of cash of \$116,699.

##### (ii) Liquidity Risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient financial resources to meet liabilities when due. As at September 30, 2020, the Company had working capital deficit of \$336,163. All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

##### *Financial Risk*

##### (iii) Interest Rate Risk

In management's opinion, the Company's interest rate risk is minimal as the Company does not have any bank indebtedness or loans payable that bear interest at fixed or variable rates.

##### (iv) Foreign Currency Risk

The Company is exposed to currency fluctuations in the acquisition of foreign currencies. The Company holds balance in cash in foreign currencies (US dollars) and is therefore exposed to gains or losses on foreign exchange. A significant change in the currency exchange rate between the Canadian dollar relative to the US dollar could have an effect on the Company's results of operations, financial position and/or cash flows. The Company has not hedged its exposure to currency fluctuations. As at September 30, 2020, a change of 10%+/- in US dollar would not result in a significant impact to the statements of loss and comprehensive loss.

##### (v) Commodity Price Risk

The Company is exposed to price risk with respect to commodity prices. The Company's ability to raise capital to fund exploration and development activities may be subject to risks associated with fluctuations in the market price of commodities.

#### **11. Business Operations**

The Company was incorporated on August 11, 2009 under the laws of British Columbia. The Company's principal business activities include the acquisition, exploration and development of resource property. The address of the Company's corporate office is 6153 Glendalough Pl., Vancouver, British Columbia, V6N 1S5, Canada.

At September 30, 2020, the Company had not yet determined whether its property contains ore reserves that are economically recoverable. The recoverability of amounts shown for exploration and evaluation assets is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development, and upon future profitable production or proceeds from the disposition of the resource property.

During March 2020, the World Health Organization declared COVID-19 a global pandemic. The contagious disease outbreak and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, leading to an economic downturn. The impact on the Company has been limited, but management continues to monitor the situation.
